

Cefas – Centre for Environment, Fisheries and Aquaculture Science

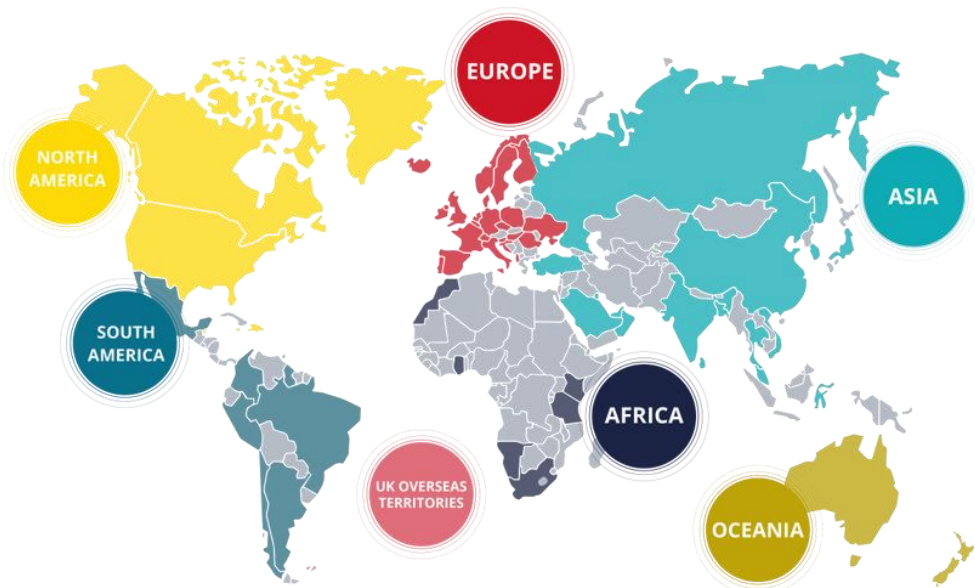

Cefas, as an Executive Agency of Defra (the UK Government's Department of Environment, Food and Rural Affairs), works to provide leading and impartial science to achieve healthy and productive aquatic ecosystems, helping safeguard the life they support, by tackling the world's most pressing environmental problems.

Cefas origins and data go back to early 1900s.

Started as a small fish laboratory in Lowestoft to support UK contributions to ICES – the International Council for the Exploration of the Sea.

Today Cefas has a wide range of resources and expertise, with more than 600 staff based across 2 UK laboratories and overseas, an ocean-going research vessel, and over 100 years of experience.

Working for a sustainable blue future.....**we work across a wide breadth of Science....**

Cefas International Centres of Excellence

- Fisheries
- Aquatic Animal Health
- Seafood Safety
- International Marine Climate Change Centre

Vision: A sustainable future for rivers, seas and the ocean

Mission: To apply our unique scientific expertise to achieve healthy and productive marine and freshwater ecosystems
